

ABOUT CANADA

Population: 33 millions **Territory:** 9,984,670 sq.km.

There are more than 1.5 million registered businesses in Canada

Canada is the world's second largest country in total area.

CANADA CONSISTS OF:

10 PROVINCES

Alberta
British Columbia
Manitoba
New Brunswick
Newfoundland and Labrador
Nova Scotia
Ontario
Prince Edward Island
Quebec
Saskatchewan

3 TERRITORIES

Northwest Territories
Nunavut
Yukon

Canada is a country occupying most of northern North America, extending from the Atlantic Ocean in the east to the Pacific Ocean in the west and northward into the Arctic Ocean. It is the world's second largest country by total area and shares land borders with the United States to the south and northwest.

The land occupied by Canada was inhabited for millennia by various groups of aboriginal people. Beginning in the late 15th century, British and French expeditions explored, and later settled along, the Atlantic coast. France ceded nearly all of its colonies in North America in 1763 after the Seven Years' War. In 1867, with the union of three British North American colonies through Confederation, Canada was formed as a federal dominion of four provinces. This began an accretion of additional provinces and territories and a process of increasing autonomy from the United Kingdom, highlighted by the Statute of Westminster in 1931 and culminating in the Canada Act in 1982, which severed the vestiges of legal dependence on the British parliament.

A federation comprising ten provinces and three territories, Canada is a parliamentary democracy and a constitutional monarchy, with Queen Elizabeth II as its head of state. It is a bilingual and multicultural country, with both English and French as official languages both at the federal level and in the province of New Brunswick. Technologically advanced and industrialized, Canada maintains a diversified economy that is heavily reliant upon its abundant natural resources and upon trade, particularly with the United States, with which Canada has had a long and complex relationship. Canada is a member of the G8, NATO, APEC, the Organization for Economic Co-operation and Development (OECD), the Commonwealth of Nations, the Francophonie, and the United Nations.

Canada is one of the world's wealthiest nations, with a high per capita income. It is one of the world's top ten trading nations. Canada is a mixed market, ranking lower than the U.S. but higher than most western European nations on the Heritage Foundation's index of economic freedom. Since the early 1990s, the Canadian economy has been growing rapidly, with low unemployment and large government surpluses on the federal level. Today, Canada closely resembles the U.S. in its market-oriented economic system, pattern of production, and high living standards.

ABOUT CANADIAN EXPORTS

“Canadian Exports” is a publication that helps International importers source the products and services they need from Canada.

OUR SERVICES ARE:

- Identifying and checking out any Canadian businesses for you.
- Helping you contact them.
- Facilitating your negotiations with them.
- Arranging business travels to meet with them.
- Informing you about Trade Missions, Business Delegations, Trade Fairs, Payment Terms and much more.

“CANADIAN EXPORTS” MATCHES CANADIAN & INTERNATIONAL BUSINESSES:

- Helps them find each other.
- Helps them meet.
- Helps them conclude successful business transactions.

“CANADIAN EXPORTS” IS:

- Credible: Since it is being distributed to members of Canadian and non-Canadian chambers of commerce, business councils, import/export associations ... etc.
- Unique: there is no other publication in Canada like it.
- Affordable: It does not cost more than an ad in your local newspaper.
- Tax deductible: Your expenses to participate with us are 100% tax deductible.
- Wide Distribution: about 75,000 businesses in more than a 100 countries and all 50 United States & it continues to grow.
- Follow-Up Support: Our customers have access to a wide range of export-related services and guidance.
- “Direct” Contact with “Interested” buyers: All contacts between you and international businesses are direct, unless, you ask for our assistance. To receive “Canadian Exports” publication, contact the Canadian business council or chamber of commerce in your country. Alternatively, follow the link “Join our Mailing List” on our website and we will e-mail it to you for free. Be sure to visit our website frequently as it is updated daily.

WE OFFER ASSISTANCE AND GUIDANCE THROUGHOUT THE IMPORT/EXPORT PROCESS. YOU ARE WELCOME TO CONTACT US AT ANY STEP OF THE WAY.

TO RECEIVE “CANADIAN EXPORTS”, FREE-OF-CHARGE:

Contact any of the following in your area: Canadian and non-Canadian chambers of commerce, business councils and most of the import/export associations. If it is not available, please contact us and we will send it to you.

“Canadian Exports” is issued by Canadian Exports Inc.

SAINT-JEAN-SUR-RICHELIEU,
Québec Canada, J3B 4S7

Tel: +1 (450) 346-7044
Fax: +1 (450) 346-0643

dll@dllinc.com www.dllinc.com

We have the pleasure to introduce DLL Inc as a North American industrial leader in the manufacturing and repairing of high tech products.

In October 1995, DLL Inc was created by its actual president Laurent Leblanc in Quebec, Canada as a small manufacturing company with only 4 employees. Today the company includes three divisions: Railway, Petroleum and Industrial with more than 40 full time employees.

DLL Inc serves the Railway, the Petroleum and the Industrial market through its activities in the fields of manufacturing new products. DLL Inc also supply rebuild parts as Utex, Outright or on Repair-Return base. The company's expertise lies in the design, development and manufacture of a comprehensive range of electrical and mechanical components, while maintaining good quality, reasonable price level and quick turnarounds.

Sales Manager

149 Minto Industrial Park Rd.
MINTO, New Brunswick
Canada, E4B 3A6

Tel: +1 (506) 327-4355
Fax: +1 (506) 327-3757

traccsales@nb.aibn.com
www.traccnb.ca

"TRACC" as we have come to be known is engaged in the collection, transportation, shredding, crumbing, and the re-manufacturing of new products from scrap tires. Located in the Minto Industrial Park, "TRACC" operates in a 40,000 square foot facility constructed on a 16.6 acre site. TRACC began full scale operation in May, 1997 and has continued in successful full scale operations for the last 10 years.

The Province of New Brunswick disposes of approximately 1,000,000 scrap tires annually. Allowing for normal spillage of 20% due to scrap tires being recapped and other uses, TRACC will collect and process approximately 1,000,000 passenger tire equivalents (PTES) per year. This will represent approximately 13,000,000 pounds of recycled rubber to be processed.

Michael A. McDermott
CEO, Owner

105-150 Crowfoot Cres NW,
Suite 209 CALGARY,
Alberta Canada, T3G 3T2

Tel: +1 (403) 201-7444
Fax: +1 (403) 770-8375

macd@roadpacker-group.com
www.roadpacker-group.com

Welcome to the website of The RoadPacker Group - one of the world's fastest growing soil stabilization companies. We specialize in environmentally safe, water soluble chemicals for soil stabilization, soil compaction, dust suppression and other soil stabilizing related products.

How we started: In 1990, RoadPacker began initial market research in Australia into the field of chemical soil stabilization. The research identified a market for this type of product, within a road construction and maintenance industry that was spending billions of dollars each year. At local, as well as national levels - many administrations/governments were spending as much as 50% of their entire budget on roads. Aided by the advances in chemical technology during the last 30 years, ongoing research led to the development of a new chemical soil stabilizer called RoadPacker Plus.

info@moderneslate.ca
www.moderneslate.ca

Moderne Slate Roofing Systems by TRACC has involved years of research and study. When the idea of creating a viable recyclable shingle came to light it was known that this shingle had to be significantly better than those on the market.

TRACC set about gaining the services of experts in the roofing field and the plastics field, testing and retesting materials to make sure that the product was 100% recyclable. We also wanted to make sure that it would gain the approval of what a roofer would look for in a shingle so we enlisted the help of veteran roofers collaborating and gaining there input. We invite you to examine Moderne Slate, so much though we have put a 50 year transferable warranty on the product. A product guaranteed to satisfy you for years to come.

www.moderneslate.ca

Moderne Slate Roofing Systems by TRACC has involved years of research and study. When the idea of creating a viable recyclable shingle came to light it was known that this shingle had to be significantly better than those on the market. TRACC set about gaining the services of experts in the roofing field and the plastics field, testing and retesting materials to make sure that the product was 100% recyclable. We also wanted to make sure that it would gain the approval of what a roofer would look for in a shingle so we enlisted the help of veteran roofers collaborating and gaining there input.

105-150 Crowfoot Cres NW,
Suite 209 CALGARY,
Alberta Canada, T3G 3T2

Tel: +1 (403) 201-7444
Fax: +1 (403) 770-8375

macd@roadpacker-group.com
www.roadpacker-group.com

Welcome to the website of The RoadPacker Group - one of the world's fastest growing soil stabilization companies. We specialize in environmentally safe, water soluble chemicals for soil stabilization, soil compaction, dust suppression and other soil stabilizing related products.

How we started: In 1990, RoadPacker began initial market research in Australia into the field of chemical soil stabilization. The research identified a market for this type of product, within a road construction and maintenance industry that was spending billions of dollars each year. At local, as well as national levels - many administrations/ governments were spending as much as 50% of their entire budget on roads. Aided by the advances in chemical technology during the last 30 years, ongoing research led to the development of a new chemical soil stabilizer called RoadPacker Plus.

www.symcod.com

Since 1990, Symcod has specialized in the development of data collection equipment. The mission of the company is: To develop and market innovative data collection equipment in specialized fields through a network of value added resellers in the software field.

Symcod is aware that a company's data collection is more than just a question of installing cables. The hardware must be appropriate, and installed with professionalism on the network level as well as the ergonomic level. It must be reliable, sturdy and affordable. The application software and the hardware must be transparent so the customer can work most effectively and receive uninterrupted service.

The customer's personnel must be well-trained but a toll-free number is available for support. For more than twelve years, this global vision driven by the customer's needs has brought worldwide success to Symcod.

bastien.industries@qc.aira.com
www.bastienindustries.ca

BASTIEN INDUSTRIES is located north of Quebec city at Village Huron (Wendake). Our company is famous for the excellence of his moccasins, snowshoes and Indian novelties. Maurice Bastien, former Grand Chief of Huron-Wendat tribe, was an expert in the production of snowshoes, to which he confined his manufacturing operations until he started the manufacture of moccasins. The popular HIAWATHA brand of hand beaded moccasins, which bear the skilful needlecraft of the majority of the women of Wendake village, are distributed to many parts of the world.
